

Merge PDF Online – Complete Guide 2026

How to Combine Multiple PDF Documents Safely & Instantly

1. What is PDF Merging?

PDF merging is the process of combining two or more separate Portable Document Format (PDF) files into a single, cohesive document. Whether you are stitching together book chapters, joining invoice receipts into a monthly expense report, or combining a resume with cover letters and certificates, PDF merging streamlines document organization and sharing.

2. How to Merge PDF Files Online

Follow these simple steps using iPDFDesign:

- Step 1: Open <https://ipdfdesign.com/merge-pdf> in your web browser.
- Step 2: Click "Select PDF Files" or drag-and-drop your target documents into the workspace.
- Step 3: Visually reorder thumbnails into your preferred page sequence.
- Step 4: Click "Merge PDF" to execute instant on-device processing.
- Step 5: Save your newly combined PDF document.

3. Common Business & Academic Use Cases

- Job Applications: Combine Resume, Cover Letter, and Letters of Recommendation.
- Legal & Financial: Join contracts, addenda, tax records, and disclosures into single audit packages.
- Academic Submissions: Merge research chapters, appendices, and bibliographies.
- Accounting: Stitch monthly invoices and receipts into single PDF reports.

4. 100% On-Device WebAssembly Privacy

Unlike traditional cloud PDF websites that upload your files to remote servers, iPDFDesign operates entirely inside your local browser memory using WebAssembly. Zero bytes leave your device, ensuring total compliance with GDPR, HIPAA, and corporate data governance rules.

5. Frequently Asked Questions (FAQ)

Q: Is there a file size limit for merging PDFs?

A: No! Because processing uses your local device hardware, there are no artificial server upload limits.

Q: Does merging reduce image quality?

A: No, iPDFDesign preserves original page vector streams and graphic resolutions intact.
