

PNG Tools & Image Optimization Guide 2026

Lossless Compression, Format Conversion & Background Removal

1. What is the PNG Format?

PNG (Portable Network Graphics) is a raster graphics format supporting lossless compression and full 8-bit alpha transparency. It is the industry standard for web icons, UI graphics, logos, and photos requiring clear backgrounds.

2. PNG vs. JPG: Key Differences

- Compression: PNG uses lossless DEFLATE compression; JPG uses lossy compression.
- Transparency: PNG supports alpha channel transparency; JPG does not.
- Best Use Cases: PNG is ideal for logos, screenshots, and text graphics; JPG is best for high-color photography.
