

Split PDF Online – Page Extraction Manual 2026

Separate Pages & Divide Large PDF Files Free

1. What is PDF Splitting?

PDF splitting allows you to extract specific pages, remove unwanted pages, or divide a massive multi-page document into individual standalone PDF files.

2. How to Split PDF Files

- Step 1: Open <https://ipdfdesign.com/split-pdf>.
- Step 2: Drag and drop your source PDF document.
- Step 3: Select exact page ranges (e.g., Pages 1-5, 8, 12-15) or click "Extract All Pages".
- Step 4: Process and download your separate PDF documents.

3. Top Use Cases

- Extracting a single contract signature page from a 50-page agreement.
- Dividing large e-books into separate chapter files.
- Removing confidential internal notes before sharing external reports.
